

Cheah Cheng Qian – Data Engineer

A data engineer with 3 years of experience in building scalable data pipelines

+60194803213 | cheahcq99@gmail.com | [linkedin.com/in/ethanccq99](https://www.linkedin.com/in/ethanccq99) | [Portfolio](#) | Kuala Lumpur, Malaysia

PROFESSIONAL EXPERIENCE

Hytech

Kuala Lumpur, Malaysia

Data Engineer

Sep 2025 – Present

- Designed and maintained scalable Databricks Delta Lake pipelines following medallion architecture (Bronze, Silver, Gold layers), processing 50M+ records from Zendesk & Fresh Service
- Built Python-based ingestion frameworks for multiple REST APIs (Zendesk, CRM) into Delta Lake, implementing incremental loading strategies and partition pruning that reduced processing time by 40%
- Architected Databricks Gold-layer aggregation pipeline using PySpark, scheduled via Databricks Workflows, compressing 5M+ Silver-layer rows into 7,000+ pre-aggregated rows, reducing Power BI file size 99%, refresh time 87%
- Performed data reconciliation, duplicate detection, null validation, and transformation verification across Medallion layers to maintain data integrity and reporting accuracy
- Optimized Delta Lake tables using Z-Ordering on frequently queried columns (e.g., user_id, mt4_account), reducing unnecessary data scans and enabling faster retrieval from multi-million-row datasets
- Developed an automated Databricks monitoring pipeline that analyzed daily withdrawal auto-approval rates across seven trading brands and delivered threshold-based alerts to Lark via webhooks.
- Awarded 3rd Place in Hytech's AI Innovation Competition (team of 6) for developing an AI-powered reporting solution that enabled Claude AI to analyze database KPIs and generate standardized analytical insights.

Turnkey Consulting

Kuala Lumpur, Malaysia

Data Analyst

May 2024 – Feb 2025

- Lead global dashboard projects, implementing BI solutions using Power BI, contributing to developing and maintaining data visualization dashboards, while liaising with country leads/directors globally- North America, Europe & APAC region
- Conducted weekly & monthly data cleaning on various data anomalies (out of date deals, missing SOW/PO, missing client information), ensuring accurate sales forecasting, implementing automated python script for data cleaning
- Developed ETL pipelines using Stitch to automate data extraction from HubSpot API, apply necessary transformations, and load the processed data into BigQuery, reducing manual intervention by 90% (5 hours vs 30 minutes weekly)
- Managed BigQuery database by performing advanced SQL queries using JOINS, CTEs, and windows function
- Provided actionable insights to internal stakeholders by analyzing key business metrics, identifying trends, and recommending data-driven strategies, enhancing decision-making for sales and marketing teams

Swap Asia

Kuala Lumpur, Malaysia

Data Analyst

May 2023 – May 2024

- Performed data reconciliation between Loader file and PSTS using Excel functions, amounting to 450k+ records, resulting into above 98% data accuracy and consistency
- Coordinated process gaps and cooperated with business analyst to propose sustainable short-term & long-term solutions for mitigating data inconsistencies, leading to a reduction in data error rate by 30%
- Proposed visualized findings using Power BI through data storytelling with actionable insights to senior management, fostering informed data driven decision making, resulting in an 8.4% increase in revenue in the device protection category
- Assisted project manager in handling various tasks, which includes manual user guide documentation, UAT, and content creation, ensuring alignment of project activities with Agile methodology, delivered LMS system within 3 months timeframe

PERSONAL PROJECTS

Retail Analytics Pipeline

github.com/cheahcq99

End-to-end data engineering pipeline

2026

- Built end-to-end pipeline (Python, Airflow, dbt, Postgres) implementing Bronze/Silver/Gold medallion architecture, containerized with Docker and git as version control

TECHNICAL SKILLS

Languages & Databases: Python, SQL, DAX, M (Power Query), MySQL, BigQuery, PostgreSQL, Linux (Bash)

Big Data & ETL: Databricks, PySpark, Delta Lake, Medallion Architecture, Apache Airflow, dbt, Stitch, Docker

BI & Automation: Power BI, Git, REST APIs, Postman, GitHub

EDUCATION

Universiti Tunku Abdul Rahman

Bachelor in Business Information Systems, Information Technology

Perak, Malaysia

Graduation Date: March 2023

Universiti Tunku Abdul Rahman

Foundation in Accountancy and Management

Perak, Malaysia

Graduation Date: September 2018

Certifications: HackerRank SQL (Intermediate) | AWS Fundamentals Specialization (Coursera)
