

CHEAH CHENG QIAN – DATA ENGINEER

A Data Engineer with 3 years of experience building scalable data pipelines

+60 19-480 3213 | cheahcq99@gmail.com | [linkedin.com/in/ethanccq99](https://www.linkedin.com/in/ethanccq99) | [Portfolio](#) | Kuala Lumpur, Malaysia

PROFESSIONAL EXPERIENCE

Hytech

Data Engineer

Kuala Lumpur, Malaysia

Sep 2025 – Present

- Designed and maintained scalable Databricks Delta Lake pipelines following medallion architecture (Bronze, Silver, Gold layers), processing 10M+ trading records from Zendesk & Fresh Service, leveraging Claude Code via MCP integration
- Built Python-based ingestion frameworks for multiple REST APIs (Zendesk, CRM) into Delta Lake, implementing incremental loading strategies and partition pruning that reduced processing time by 40%
- Architected Databricks Gold-layer aggregation pipeline using PySpark, scheduled via Databricks Workflows, compressing 5M+ Silver-layer rows into 7,000+ pre-aggregated rows — cutting Power BI file size 99%, refresh time 87%
- Developed Python script using Selenium to automate the daily process of data extraction and transformation from Zendesk to Lark for backlog record, eliminating manual data entry

Turnkey Consulting

Data Analyst

Kuala Lumpur, Malaysia

May 2024 – Feb 2025

- Developed automated ETL pipelines using Stitch to ingest data from the HubSpot API into BigQuery, transforming raw operational data into analytics-ready datasets while reducing manual processing by 90% (5 hours to 30 minutes weekly)
- Designed and optimized SQL transformation pipelines in BigQuery using modular queries and data modelling techniques to support scalable multi-region reporting
- Implemented Python-based data quality validation frameworks to detect missing, inconsistent, and stale records before downstream ETL and reporting processes, improving overall data reliability

Swap Asia

Data Analyst

Kuala Lumpur, Malaysia

May 2023 – May 2024

- Performed large-scale data reconciliation across 450,000+ records using advanced Excel functions to validate data integrity, achieving over 98% data accuracy and consistency
- Designed Power BI dashboards and KPIs to visualize business performance, enabling senior management to make data-driven decisions that increased Device Protection revenue by 8.4%

PERSONAL PROJECTS

Retail Analytics Pipeline

End-to-end data engineering pipeline

github.com/cheahcq99

2026

- Built end-to-end pipeline (Python, Airflow, dbt, Postgres) implementing Bronze/Silver/Gold medallion architecture, containerized with Docker and git as version control

TECHNICAL SKILLS

Languages & Databases: Python, SQL, DAX, M (Power Query), MySQL, BigQuery, PostgreSQL, Linux Command Line (Bash)

Big Data & ETL: Databricks, PySpark, Delta Lake, Medallion Architecture, Apache Airflow, dbt, Stitch, Docker

BI & Automation: Power BI, Git, REST APIs, Postman, GitHub

EDUCATION

Universiti Tunku Abdul Rahman

Bachelor in Business Information Systems, Information Technology

Perak, Malaysia

Graduated March 2023

Universiti Tunku Abdul Rahman

Foundation in Accountancy and Management

Perak, Malaysia

Graduated September 2018

Certifications: HackerRank SQL (Intermediate) | AWS Fundamentals Specialization (Coursera)
